

Spinal Muscular Atrophy in Maine Coon Cats

Spinal muscular atrophy (SMA) in Maine Coon cats is caused by a large deletion in chromosome A1 that eliminates two genes.

SMA is inherited in an autosomal recessive fashion. Affected kittens, having two copies of the deletion, will have inherited a deletion from both parents.

Carriers of the SMA deletion (ie. carrying only one copy) show no signs of the disease. IF two carriers mate then by probability, approximately 25% of kittens will have SMA.

SMA is due to the death of spinal cord nerves that normally stimulate the skeletal muscles of the trunk and limbs. The loss of these nerves can lead to kittens developing a swaying in their gait, particularly in their hind quarters.

Animal DNA Laboratory now offers a simple DNA test to identify the SMA deletion for Maine Coons. A simple cheek swab can be sent to our laboratory to identify whether a cat is either normal, affected or a carrier.

The test can be performed on cats of any age, so long as you can obtain a reliable sample.

DNA Question Corner—win free tests

Animal DNA Laboratory gives all readers the opportunity to ask questions relating to our services. The best question each issue will win 2 free DNA tests and be published in the Animal DNA Laboratory newsletter. So if you have a question simply send it to:

dnaquestions@animalsdna.com

This quarter's winner is Suzanna from Germany who asked.

"I do not like sending off my credit card details in the post. Is there an alternative way to pay for your testing services?"

Dear Suzanna,

Animal DNA Laboratory can now accept payment via Paypal.

Paypal is an electronic system allowing payments and money transfers to be made through the internet. It enables anyone with an email address to send and receive payments online. As a buyer you can pay for your item, or service online through Paypal without sharing your financial information. You are able to fund your payment with your debit card, credit card, bank account or Paypal balance.

To set up a Paypal account or get further information, go to www.paypal.com

How to make a Paypal Payment

1. Set up a Paypal account on the above website.
2. Indicate you want to pay by Paypal on the order form.
3. When we receive the swabs we will send you an email confirming receipt of your order and prompting you to make the Paypal payment.
4. Pay by Paypal (admin@animalsdna.com) and insert the unique 5 digit number we send you in the email so that we can identify your payment.

Feedback from Animal DNA Laboratory Customers

"Thank you for providing such a great service at an excellent price. When I told friends that I was getting my cat DNA tested to ensure that she was a lilac, they all said "That will cost you a fortune!". I told them about how much I paid for the 2 tests and they were surprised at the low cost"

Thanks again

Susan, Australia

Feedback from ADL Customers continued.

“Thank you that was very quick :-) A very pleasant first time experience for me all round! I will be telling my friends about your service”

Jody, New Zealand

“Thanks so much for such great results !!

You will be hearing from me again I am sure....I like all my breeding cats to have their own copies of documents and we do change over our breeding stock very quickly - so I'll be around again !! :)”

Warm wishes

Lou, USA

“Thank you very very much for getting the results back so quickly. I really appreciate it, your company's service is fantastic and I will be using your company again and recommending you to everyone”

Thanks

Sheryn, Australia

“Thank you very much
the results came quickly!

it's great! you are very professional
see you”
